computed cell at the neck

Size is not enough

patient-sized breast CTCs:
only 1.3–1.7-fold enrichment
by size

Retain the tumour cell

in these data tumour cells
are stiffer than leucocytes:
$\Delta P_{leu} < \Delta P_{applied} < \Delta P_{tum}$

The cortex resists entry

while the aperture is wider
than the nucleus

Design by geometry and β

entry shape and pressure
per unit velocity set
the operating point
